## PROJECTS

### PrepPilot AI

- Engineered a live, camera and microphone enabled mock interview module driven by an AI interviewer, handling real-time media streaming and state sync between the React.js frontend and Node.js/Express.js backend
- Added proctoring controls continuous webcam/mic monitoring and enforced fullscreen mode with violation flagging to keep interview sessions authentic, alongside OTP/JWT authentication for secure access
- Automated a post-interview scoring pipeline generating structured, answer-grounded feedback reports, alongside 5+ additional AI modules (email analysis, mock tests, personalized recommendations) built with Gemini AI across 21+ React components and 49 REST APIs
- Tech Stack: React.js | Express.js | Node.js | MongoDB | Gemini AI | Gmail API

### CareerVerse AI

- Architected an AI powered career and scholarship platform using Groq AI (Llama 3.3 70B), personalizing roadmaps across 10+ career domains and cutting manual research time for students at every academic stage
- Developed a secure FastAPI backend with MongoDB and JWT authentication, and connected OpenStreetMap APIs to speed up institution discovery through real-time, location-based search
- Created 6+ React.js modules including an AI counsellor, skill profiler, and scholarship matcher, consolidating a fragmented decision process into one guided experience
- Tech Stack: React.js | FastAPI | Python | MongoDB | Groq AI

### E-Commerce Web Application using MERN

- Built a full stack MERN application spanning 10+ pages, streamlining product discovery, cart management, and order placement into one seamless flow
- Engineered 8+ REST APIs powering search, cart, and checkout, reducing page-to-page latency and smoothing the end-to-end purchase experience
- Tech Stack: MongoDB | Express.js | React.js | Node.js | JavaScript

## EDUCATION

|                                                                       |                        |
|-----------------------------------------------------------------------|------------------------|

## ACHIEVEMENTS

- Awarded College Monthly Topper badge (1 Time Topper) on **Code360**
- Solved 900+ problems and attained the 365 Days Badge on **LeetCode**
- Cracked 350+ problems and achieved a 2-Star rating on **CodeChef**
- Reached an 850+ rating by tackling algorithmic problems involving data structures on **Codeforces**
- Earned 3-Star in Python and C++ along with 4-Star in Java and SQL by working through coding challenges on **HackerRank**

## ACTIVITIES & LEADERSHIP

- Participated in **Google HackSprint**, contributing to collaborative problem-solving and rapid solution development.
- Received a **Certificate of Excellence** in the Zonal Round of Women Who Master Hackathon 2026, a Generative AI initiative by Logitech and Aspire For Her, among 2,500 shortlisted participants from 1,20,000+ applications, helping establish a **Guinness World Records** title.
